Ilya Bachkou, Senior IOS Engineer

Bratislava, Slovakia, +421944632814, ilyabochkovib@gmail.com

PROFESSIONAL SUMMARY

Senior iOS Engineer with 6+ years building high-performance, user-focused mobile apps. Responsible for technical competence of Communication Channels domain at a banking app serving millions of users (chat, in-app call, notifications). I enjoy using perfect software, and this motivate me to provide the best possible experience for the users of my work.

EMPLOYMENT HISTORY

Apr 2022 — Present

Senior iOS engineer, AlfaBank

Started working as a regular developer on the chat product team, then took responsibility for technical competence of Communication Channels domain and have been combining both roles ever since. Participated in the development of Server Driven UI. Conducted interviews for new candidates

Main achievements:

- refactoring of core chat layer for better performance and usage flexibility
- new types of messages (images, files, voice, video, animated stickers)
- ability to reply, delete messages and add reactions with custom context menu
- in-app call with WebView layer (recording, converting and playing frames) with full CallKit support
- separated chat with LLM-agent
- migration chat from PromiseKit to async/await

New technologies:

- Unit and Snapshot testing (Quick and Nimble)
- Clean Swift architecture
- Complex collection view with custom layout and performance optimizations
- CI/CD (Jenkins, Groovy)
- WebSocket, WebRTC, RouteComposer, PromiseKit
- Server Driven UI, in-app calls, code obfuscation, Haptic, accessibility
- async/await

Jul 2021 — Apr 2022

iOS Developer, ServiceDesk

Worked on outsourcing projects:

- Bank app for legal entities - documents signing flow, migration modules from Objective-C to Swift, integration of design system
- Public transport fare payment app - integration of communication with BLE beacons
- Bank app (yes, one more) - precious metals buying flow, companion app for watchOS, main screen redesign
- Advertising framework - common solution for loading, displaying and tracking banners in applications

New technologies:

- VIPER architecture
- Bluetooth, watchOS, Objective-C

Jun 2020 — Jul 2021

iOS developer, Yellow Systems

Developed small product applications (from scratch). Maintained local frameworks with reusable code for analytics, in-app purchases, UI components and a data layer.

Technical stack:

- UIKit, SwiftUI
- MVVM, MVP architectures
- CoreData, Keychain, UserDefaults
- StoreKit, HealthKit, WidgetKit, CoreLocation, AVFoundation
- Alamofire, RXSwift, SnapKit, Firebase, Amplitude, AppsFlyer
- Cocoapods, fastlane
- App extensions, push notifications, subscription

EDUCATION

Sept 2018 — Jun 2022	Information security , Belarussian State University Graduate project on the topic of securing a network connection in iOS	Minsk
